

Linking ProQuest to WISCAT

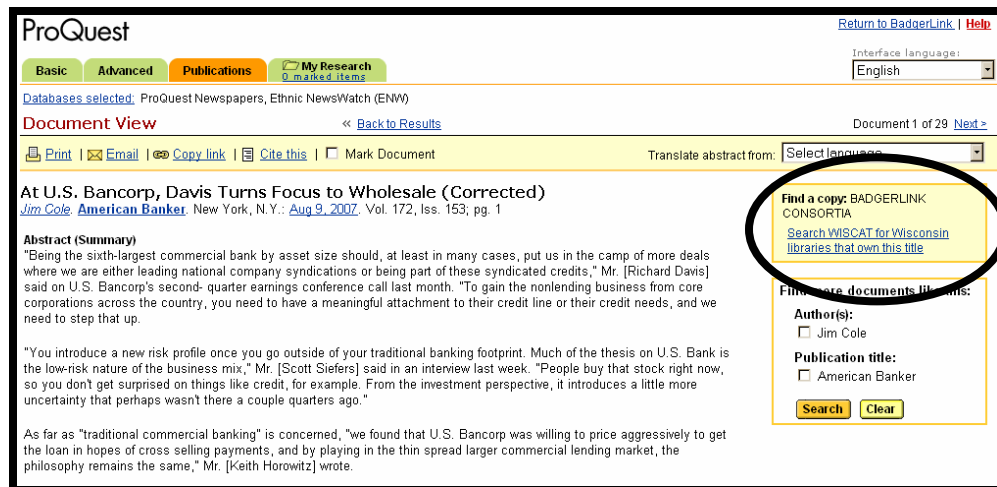

Links have also been added to ProQuest that allow the user to link directly into a specific title in the WISCAT union catalog, when full-text is not available online. With this link, the user may identify libraries that own the title for interlibrary loan of a photocopy of the desired article. ProQuest searches WISCAT using ISSN and Title to locate the specific title, if available.

When full-text is not available in ProQuest, the user sees a Find a copy link next to the Abstract.

ProQuest search result showing Find a Copy link feature

Clicking on the Find a copy link will take the user to the Abstract screen and a box on the right side that includes a link to the title in WISCAT.
